ABSTRACT

At the close of each fiscal year, the 49 public community colleges of the Illinois Community College System (ICCS) are required to submit detailed student records to the ICCS Board providing data on annual enrollments and completions for credit-generating students. Highlights for fiscal year (FY) 1994 include the following: (1) ICCS institutions enrolled 692,276 students in instructional credit courses, a decrease of 4.4% from the previous year; (2) annual full-time equivalent (FTE) was 228,522, a decrease of 3.9% from FY 1993; (3) the percent of minority students increased slightly (0.3%), even though the number decreased by 3.5%; (4) the median age of students was 27.2, slightly younger than the previous year; (5) three out of four students attended part-time in FY 1994; (6) 27% of students were enrolled in occupational programs, while associate degree nursing was the largest occupational program with 14,797 students; (7) nearly 39,000 degrees and certificates, including 22,500 occupational degrees and certificates, were awarded in FY 1994, a 1.8% increase over FY 1993; (8) females accounted for 60% of all completions; (9) minority students earned 19% of the collegiate-level degrees awarded, comprised 22% of occupational program completers, and accounted for 14% of the total graduates with baccalaureate or transfer degrees; and (10) only 58% of the students who successfully completed baccalaureate/transfer degrees had indicated an intention to transfer to a four-year institution, while only three-fourths completing occupational degrees had indicated that their goal was to earn an associate degree. INTRODUCTION

The colleges in the Illinois community college system are required to submit detailed student records twice during each fiscal year. Fall opening enrollment (E1) data for credit-generating students are recorded by the colleges at the end of the regular fall registration period, which is usually the 10th day of the term. Annual student enrollment and completion (A1) data are reported for all students who are officially enrolled at the college any time during the fiscal year. An A1 record also is submitted for students who graduate but are not officially enrolled during the year. Noncredit community education classes are not considered.

For many years, the Illinois Community College Board compiled a report on the fall enrollment records. These data provide a point-in-time or "snapshot" of fall term enrollment allowing year-to-year and institution-to-institution comparisons. Further, they are comparable to fall enrollment data in postsecondary institutions nationwide. However, the diversities of the community college system and its students were not captured in this report. This is because the age, attendance patterns, and goals of the community college student are unconventional. Students "stop in and out" of college according to their individual needs and may not always be enrolled at the beginning of a fall semester. The increase in module classes adds to the complexity of tabulating student enrollments at any given time. Additionally, with elevated emphasis on student outcomes and program effectiveness, analyses of student completions have become increasingly important. These anomalies are best captured in the annual enrollment data. Therefore, the analyses in this report have focused on annual enrollment and completion records in an effort to secure the most comprehensive and accurate information available.

This is the second year of publication for this report. This year's report is based on fiscal year 1994 annual enrollments and completions for credit-generating students as provided by the colleges at the close of the fiscal year. For comparison with past enrollments and completions, summary data for the four previous fiscal years (1990 - 1993) also are presented. Detailed tables comparing fiscal year 1993 and fiscal year 1994 headcount and full-time equivalent (FTE) enrollments by college are included. FTE enrollments in this report are based on all credit hours attempted (including nonreimbursable credit hours). Supplementary enrollment and completion data for each community college will be available in the 1995 edition of the *Data and Characteristics of the Illinois Public Community College System*.

**Student Enrollments & Completions
Fiscal Year 1994**

HIGHLIGHTS OF FISCAL YEAR 1994 ANNUAL DATA REPORT

Student Enrollments

- ▶ During fiscal year 1994, the 49 public community colleges in Illinois enrolled 692,276 students in instructional credit courses, a 4.4 percent decrease from the previous year.
- ▶ The annual full-time equivalent (FTE) enrollment was 228,522, a decrease of 3.9 percent over fiscal year 1993.
- ▶ The number of female students decreased by 4.8 percent in fiscal year 1994. The number of male students, comprising approximately 45 percent of the student population, decreased 3.9 percent.
- ▶ The percent of minority students enrolled in the Illinois community college system increased slightly (0.3 percent) even though the number decreased by 3.5 percent. The number of black students decreased 5.7 percent, while the Hispanic student population decreased only 1.7 percent.
- ▶ The median age of community college students in Illinois was 27.2 during fiscal year 1994, slightly younger than the previous year. The average age has remained at approximately 31 for the past five years.
- ▶ Baccalaureate/transfer program enrollments increased 10.5 percent from 1993 and 37.7 percent since fiscal year 1990.
- ▶ Three out of four students attended on a part-time basis during both the fall and spring semesters in fiscal year 1994.
- ▶ Illinois community college students were enrolled for nearly 6,900,000 credit hours throughout fiscal year 1994 and earned more than 74 percent of those hours.
- ▶ As in fiscal year 1993, associate degree nursing was the largest occupational program, enrolling 14,797 students in fiscal year 1994.
- ▶ Although more than two-fifths of the fiscal year 1994 student population was enrolled in the baccalaureate/transfer area, only one-fifth of all students indicated an intent to transfer. While 27 percent were enrolled in occupational programs, over 37 percent of the student population indicated their intent was to prepare for a new career or improve occupational skills.
- ▶ Fifty-three percent of all students indicated a desire to complete one or several courses, while 33 percent listed completion of an associate degree as their enrollment objective.
- ▶ Accumulated credit hours were collected on 65 percent of the fiscal year 1994 student population. Of that percentage, one-third accumulated 30 or more college-level hours (sophomore level).
- ▶ Of those community college students (69 percent) from whom data have been collected, 16 percent are known to already have earned some type of collegiate certificate or degree.
- ▶ In fiscal year 1994, the Illinois community college system reported 13 percent of their students' high school percentile rank. Fifty-two percent of the students ranked in the upper half of their graduating class, while 5 percent were in the top ten percentile.
- ▶ Approximately 11 percent of the community college student population reported their ACT scores. Forty-three percent received a score of 19 or higher on the ACT exam.

HIGHLIGHTS OF FISCAL YEAR 1994 ANNUAL DATA REPORT
(Continued)

Student Completions

- ▶ Nearly 39,000 degrees and certificates were awarded to students in the Illinois community college system in fiscal year 1994, a 1.8 percent decrease over fiscal year 1993. Collegiate-level completions increased slightly (0.9 percent).
- ▶ Students successfully completed approximately 22,500 occupational degrees and certificates in Illinois community colleges during fiscal year 1994, a 0.8 percent increase over the previous year.
- ▶ Nearly 14,000 baccalaureate/transfer degrees were earned during the fiscal year, an increase of 0.6 percent since 1993.
- ▶ Throughout fiscal year 1994, nearly 1,800 adult education certificates were acquired by students in adult basic and adult secondary programs, a substantial decrease (37 percent) from 1993. Most of these students completed the adult secondary education (GED) program.
- ▶ Females accounted for 60 percent of all completions during fiscal year 1994. This same proportion was reflected in each of the various program areas.
- ▶ The largest number of male completers (3,742) was in the associate in applied science degree program. However, the majority of AAS graduates (65 percent) were female.
- ▶ The highest percentage (24 percent) of students who were awarded degrees and certificates during fiscal year 1994 were between 21 and 24 years of age. Nearly as many (21.5 percent) completers were between 31 and 39 years of age.
- ▶ Minority students earned 19 percent of the collegiate-level degrees completed in the Illinois community college system during fiscal year 1994. Blacks achieved 58 percent of the minority successes, while Hispanics earned one-fifth.
- ▶ Minority students comprised 22 percent of occupational program completers. Blacks accounted for 13.2 percent, while Hispanics comprised 4.5 percent of the total number of the completers.
- ▶ Minorities comprised only 14 percent of the total graduates with baccalaureate/transfer degrees. Slightly more than 7 percent of the degree recipients were black, while 3.2 percent were of Hispanic origin.
- ▶ Only 58 percent of the students who successfully completed baccalaureate/transfer degrees in fiscal year 1994 had indicated their intent to transfer to a four-year institution.
- ▶ Only three-fourths of those students completing an occupational degree during fiscal year 1994 had indicated that their goal was to earn an associate degree.

FISCAL YEAR 1994 STUDENT ENROLLMENTS

Student Enrollment by Community College

Annual enrollment for fiscal year 1994 was 692,276 and FTE students totaled 228,522. Table 1 contains comparative enrollment data for the last five years. The fiscal year 1994 total headcount enrollment decreased 4.4 percent and total FTE enrollment decreased 3.9 percent from fiscal year 1993. Although headcount enrollments have increased only slightly since 1990 (0.6 percent), FTE enrollments significantly increased (6.3 percent).

Table 1 SUMMARY COMPARISON OF ANNUAL ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 1990 - 1994					
	<u>FY 90</u>	<u>FY 91</u>	<u>FY 92</u>	<u>FY 93</u>	<u>FY 94</u>
Headcount	687,890	705,904	727,310	724,161	692,276
% Change	4.0%	2.6%	3.0%	-0.4%	-4.4%
FTE	215,012	225,004	236,852	237,762	228,522
% Change	DNA	4.6%	5.3%	0.4%	-3.9%

SOURCE OF DATA: Annual Enrollment (A1) Records

Table A-1 in the appendix provides a comparison of fiscal year 1990 through fiscal year 1994 headcount enrollments for each community college. Of the 49 community colleges, nine colleges experienced increases in headcount, while 36 exhibited decreases during the past year. Three colleges experienced little or no change (1.0 percent or

less) over the last year. Table A-2 contains a comparison of FTE enrollments for the five-year period, indicating an identical number of changes in the past year.

Male/Female Distribution

The male/female distribution of students in fiscal year 1994 has changed little in the past five years. Females comprised 55.1 percent of the student population. The percentage of male students has averaged 44.9 percent over the past few years. (See Table A-3.)

Ethnic Origin

Although the overall number of students decreased in the past year, the proportion of minority student enrollments in fiscal year 1994 (32.7 percent) grew slightly from 1993 (32.4 percent). Among the minorities, the black population experienced a decrease in proportion, while the Hispanic, Asian, and Nonresident Alien groups increased their share of the total headcount from fiscal year 1993 to fiscal year 1994. (See Table A-4.)

Student Age

The average age of the Illinois community college student is 30.8 years. The median age is 27.2 years. Although the largest proportion of students (23.7 percent) is in the 17-20 year-old category, the next highest proportion (19.4 percent) is more than ten years older (31-39 years old). The third largest group, 21-24 years-old, has experienced the largest growth, 17 percent, since 1990. (See Table A-5.)

Summary of Enrollments by Instructional Program Area

The baccalaureate/transfer and occupational programs are the largest instructional programs offered in the Illinois community college system. Both of these programs have experienced increases since 1990 of 37.7 percent and 2.1 percent, respectively. Although the occupational program showed a decrease of 5.5 percent from fiscal year 1993 to fiscal year 1994, the baccalaureate/transfer program exhibited a 10.5 percent increase over the same time period. Decreasing enrollments also were experienced in adult education (27.3 percent) and general studies (26.5 percent). (See Table A-6.)

Instructional Program Enrollments by Gender. During fiscal year 1994, females outnumbered males in all but one instructional area; the adult education program contained the highest proportion of male students (50.4 percent). The highest proportion of females (64.5 percent) was enrolled in the general studies certificate program. The male/female distribution within the baccalaureate/transfer area and occupational area mirror the overall male/female distribution. (See Table A-7.)

Instructional Program Enrollments by Racial/Ethnic Origin. An examination of each racial/ethnic group's representation across program areas in fiscal year 1994 indicates that the largest percentage of Hispanic (45.3 percent), Asian (44.3 percent), white (42.6 percent), and American Indian (34.6 percent) students were enrolled in baccalaureate/transfer programs. The highest percentage of Nonresident Alien students (34.6 percent) and blacks (30.5 percent) were enrolled in adult education programs. Overall, minority students were represented the least in the occupational program and general studies areas (see Table A-8). Figure 1 illustrates the distribution of minorities in the two largest program areas, baccalaureate/transfer and occupational/career.

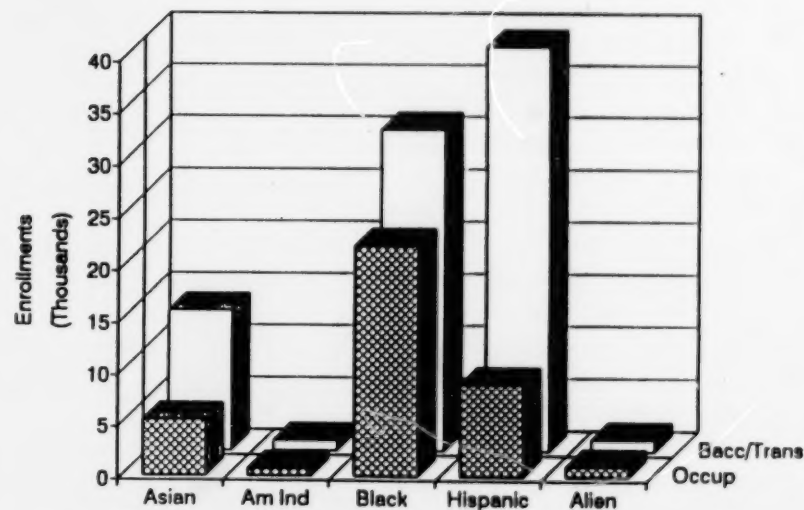

Fig. 1. Fiscal Year 1994 Minority Enrollments in Baccalaureate/Transfer and Occupational Programs

Instructional Program Enrollments by Age. Overall during fiscal year 1994, 42.4 percent of community college students were under 25 years of age. This age group was predominately (51.9 percent) enrolled in the baccalaureate/transfer program. The 25-39 year-old age group comprised 35.3 percent of the total student population. One-third of this age group was enrolled in the occupational program area, while another third was enrolled in the baccalaureate/transfer program. For those students who were 25 years of age or older, 37 percent were at least 40 years old. Nearly one-third of these "older" (40+) students were enrolled in the occupational program area, while 30 percent were enrolled in the baccalaureate/transfer program. (See Table A-9.)

Largest Occupational Programs. An examination of those occupational curricula with at least 5,000 students enrolled indicated that the associate degree nursing program was the most enrolled program in fiscal year 1994. This program has decreased by 2.9 percent, or 444 students since the previous year. The second largest program, business data programming, and third highest enrolled occupational program, criminal justice technology, also experienced decreasing enrollments. Child care provider, accounting/bookkeeping, business administration & management, and administrative assistant also were among the largest occupational programs. The child care provider program was the only program in this list to experience an increase in enrollment in the past year. (See Table A-10.)

Instructional Program Enrollments by Intent. Intent data convey the student's primary goal that he/she wants to achieve as a result of his/her studies. The intent data are self-reported by students when they initially enroll at the college. Some, but not all, colleges ask students to update this information periodically. An examination of intent data across program areas illustrates the diversity of interests and needs that community college students possess. Three goals represented the aspirations of well over half of community college students: 23.2 percent were preparing for a new or first occupational career, 20.8 percent were preparing for transfer to a four-year college or university, and 13.4 percent were striving to improve their present occupational skills. Examination of student intent by the various program areas reveals some interesting observations. Only 38.6 percent of the students enrolled in the baccalaureate/transfer area indicated that they intended to transfer to a four-year institution. Two-thirds of those students in occupational programs had enrolled with an intent of preparing for an occupational career or to improve their present occupational skills. Fifty-eight percent of the adult education students listed a desire to remedy basic skill deficiencies or to prepare for the GED test as their reason for attending. Less than half of the students in any program area were pursuing the particular goal that is most often associated with a given major. (See Table A-11.)

Instructional Program Enrollments by Enrollment Objective. Enrollment objective data also are self-reported and are designed to assist colleges in classifying students by curriculum or course enrollee category. The objective conveys the student's expected outcome from attending the community college. Eighty-six percent of the students indicated one of two objectives: to complete one or several courses (52.7 percent) or to complete an associate degree (32.9 percent). A review of student objectives by program area reveals expected results: 42 percent of the baccalaureate/transfer students desired to complete an associate degree, while 47 percent wanted to complete one or several courses (most likely for transfer). Nearly half of the occupational/career students indicated that they expected to complete an associate degree, while more than one-third listed that they expected only to complete one or several courses. These data illustrate the diversified needs of occupational students in the community college system. Many students strive to complete an entire program, while others simply want to improve their current skills or obtain enough skills to enter into a different career. Employers often do not require that a student earn a certificate or degree; only that they acquire the skills necessary to perform specific job duties. As expected in the general studies and adult education programs, the majority (88.0 and 79.8 percent, respectively) of students planned only to complete one or several courses. (See Table A-12.)

Enrollment Hours by Term and Type of Attendance

Three out of every four students attended college on a part-time basis during the fall and spring semesters of fiscal year 1994. Nine of every ten students attended part time during the summer term. A larger number of students attended Illinois community colleges in the fall semester (404,057) than in the spring semester (392,607). (See Table A-13.) In all, 6,855,659 credit hours were attempted by students during fiscal year 1994.

Highest Degree Earned by Students Prior to Attending Community College

The educational background of community college students is diverse. An examination of the degrees earned by students prior to their enrollment in community college reveals such a diversity. Of the 69 percent of students who reported their previous degrees earned (excluding adult education students who would normally not have any earned degrees), 16 percent already had earned some type of certificate or degree. More than 13 percent of those who were continuing their education had earned degrees beyond the community college level. (See Table A-14.)

Attempted Versus Earned Hours

At all colleges and universities, there are always students who, for a variety of reasons, are unable to complete the requirements for the class in which they are enrolled. In fiscal year 1994, Illinois community college students completed 5,103,511 credit hours, or 74.4 percent of their attempted hours. Of the 449,157 students for whom data were available, two-thirds had already accumulated up to 30 college-level hours (freshman level). An additional 19 percent had accumulated between 30 and 59 credit hours (sophomore status). (See Table A-15.)

Grade Point Averages

Cumulative grade point average data were available for 59 percent of the fiscal year 1994 enrollments. Eighty percent of the students had a grade point of 2.01 (C average) or above. Thirty-seven percent had achieved a grade point between 2.01 and 3.00 (C to B), while nearly 43 percent were in the 3.01 to 4.00 (B to A) range. (See Table A-16.)

High School Graduation Percentile Rank

High school percentile rank is a newly collected data item for the community college system. Thirteen percent of the students' high school graduating ranks for fiscal year 1994 was reported by the colleges. Of this population, 5 percent were in the top tenth percentile of their graduating class, while 52 percent graduated in the top half of their class. (See Table A-17.)

ACT Scores of Community College Students

Collection of ACT scores of community college students also is a recently requested data item. Data were available for 11 percent of the students. Results counter a popular misconception about community college students -- they often attend community college because their scores are not high enough to be accepted at most colleges and universities. However, nearly half of the students received a 19 or higher on the ACT exam. A minimum of 18 on the ACT exam normally is required for acceptance into most colleges or universities. For those fiscal year 1994 students from whom data were gathered, the average ACT score was 16.4. The median score was 20. (See Table A-19.)

FISCAL YEAR 1994 COMPLETIONS

Degrees and Certificates Awarded

The number of degrees and certificates awarded to Illinois community college students in fiscal year 1994 totaled 38,613. Table 2 contains comparative completion data for the last five years. The number of degrees and certificates awarded decreased by 1.8 percent over fiscal year 1993. Compared to fiscal year 1990, total fiscal year 1994 completions increased by more than 13 percent. An examination of completions by program area reveals increases in the collegiate area. However, adult education completions, which are extremely difficult to track, experienced a substantial decrease, 36.7 percent, in the past year.

Table 2
SUMMARY COMPARISON OF ANNUAL COMPLETIONS
IN ILLINOIS PUBLIC COMMUNITY COLLEGES
FISCAL YEARS 1990 - 1994

	<u>FY 90</u>	<u>FY 91</u>	<u>FY 92</u>	<u>FY 93</u>	<u>FY 94</u>

% Change	13.7%	-0.6%	9.4%	5.9%	-1.8%

SOURCE OF DATA: Annual Enrollment and Completion (A1) Records

Degrees and Certificates Awarded by Program Categories

Of the nearly 39,000 completions during fiscal year 1994, more than half (58.1 percent) were occupational degrees or certificates. Baccalaureate/transfer degrees accounted for more than one-third of the completions. Among these baccalaureate/transfer degrees, the associate in arts degree was most commonly awarded (57.8 percent). More than one-third of the degrees bestowed were associate in science degrees. The proportion of AA and AS degrees granted has not changed from the previous year. The total number of transfer degrees awarded has increased 0.6 percent since fiscal year 1993 and more than 15 percent since fiscal year 1990.

An examination of the occupational degrees and certificates awarded in fiscal year 1994 reveals that over 47 percent (10,571) were associate in applied science degrees. One-third of the completions were for certificates of less than one year. The total number of occupational completions increased 0.8 percent in the last year. Compared to 1990, occupational completions increased more than 25 percent.

Comparison of adult basic and adult secondary education certificate completions over the past few years illustrates the outside influences on the program. The loss of State Legalization Impact Assistance Grants to the colleges resulted in a significant drop in fiscal year 1991. The number of completions in the adult education program have fluctuated throughout the past several years due to the problematic nature of reporting adult education graduates and inconsistencies in data reported by some colleges. The Illinois Community College Board recently has initiated changes in data collection procedures, which will improve future adult education information. (See Table B-1.)

Summary of Graduates by Degree Categories

Gender of Graduates by Degree Category. During fiscal year 1994, three out of five degrees and certificates were earned by females. The degree attained by the highest proportion of females was the associate in applied science degree (64.6 percent). The general associate degree had the highest proportion of males (45.1 percent), although the associate in applied science degree program had the highest number of male graduates (3,742). The male/female distribution within the baccalaureate/transfer degree area reflects that of the overall proportion. Generally, occupational degrees and certificates were awarded to females slightly more often than in the other program areas. (See Table B-2.)

Racial/Ethnic Origin of Graduates by Degree Category. Approximately 20 percent of all degrees and certificates awarded in fiscal year 1994 went to minority students. An examination of the collegiate-level graduates reveals nearly the same proportion (19.4 percent) of minority students. Fourteen percent of all fiscal year 1994 baccalaureate/transfer degrees went to minority students, the majority of which were associate in arts designations (60 percent), while 38 percent were associate in science degrees. A slightly larger number of minority graduates was found in the baccalaureate/transfer area (1,875) than the occupational degree/certificate area (1,620). However, minorities comprised a slightly larger portion of occupational degrees (15 percent) than baccalaureate/transfer degrees (14 percent). Nearly three times as many blacks completed collegiate-level programs than did Hispanics in fiscal year 1994. Black and Hispanic numbers were comparably proportionate within the precollegiate-level completions. Comparisons (excluding precollegiate-level students) indicate slightly more degrees than certificates awarded to minorities (see Table B-3). Figure 2 illustrates the distribution of minority students who successfully completed degree programs in the Illinois community college system during fiscal year 1994.

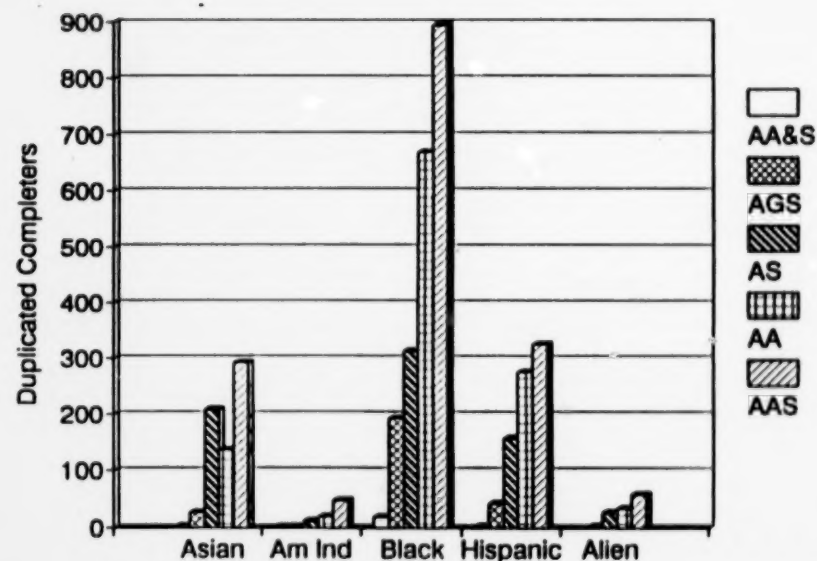

Fig. 2 Fiscal Year 1994 Degrees Earned by Minority Students

Age of Graduates by Degree Category. The highest percentage (24 percent) of completers was in the 21-24 year-old group. These graduates were split evenly between the two largest degree programs, baccalaureate/transfer and occupational (46.2 percent and 49.2 percent, respectively). The majority of those students younger than this age group (under 21 years of age) graduated with baccalaureate/transfer degrees (57.8 percent). The majority of those students in the 25 years of age or older groups earned degrees and certificates in occupational programs. In fact, up to the age of 56 years, the proportion of occupational graduates increased as age advanced. The largest number (605) of precollegiate-level graduates was under 21 years of age. (See Table B-4.)

Intent of Graduates by Degree Category. These self-reported data convey the student's primary goal that he/she wants to achieve as a result of his/her studies. Fifty-eight percent of those students who attained a baccalaureate/transfer degree had indicated that they wished to prepare for transfer to a four-year institution. Nearly one-fourth of these successful students had indicated that they desired to prepare for a new or first occupational career, an intent that would most often be associated with seeking an occupational degree or certificate. Likewise, only 66 percent of those students who attained an occupational degree or certificate had indicated that they were preparing for a new or first occupational career or improving present occupational skills. Eleven percent of these occupational graduates had indicated that they sought preparation for transfer to a four-year institution. However, an occupational degree does not preclude that the student will not seek transfer. A review of the precollegiate completers' intent revealed that one-fifth of the adult secondary education graduates plan to proceed toward a new or first occupational career. Over half of the adult basic education completers had not designated their intentions. (See Table B-5.)

Student Objective of Graduates by Degree Category. The self-reported student objective conveys the student's expected outcome from attending the community college and should mirror the completions of those students. Nearly three-fourths of those students who earned baccalaureate/transfer degrees in fiscal year 1994 had indicated that they enrolled with a desire to complete an associate degree. Eighteen percent had indicated that they wanted to complete only one or several courses. More than three-fourths of the occupational students who earned an associate in applied science degree had listed completing an associate degree as their objective. Thirty-one percent of the collegiate-level students who set out to complete a certificate went beyond their expectations and earned an associate degree. While 70 percent of the adult education completers had indicated that they only expected to complete one or several courses, 15.6 percent had identified a desire to complete an associate degree and now are better prepared to do so. (See Table B-6.)

SUMMARY

An examination of the fiscal year 1994 demographic enrollment data reveals that there is not a "typical" community college student; three-fifths of the students are female, two-fifths are of a minority origin, and two out of every five students are 31 years of age or older.

Based on the fiscal year 1994 data, community college enrollments have decreased since the previous year. Despite this overall decrease, collegiate-level programs have increased in number, particularly the baccalaureate/transfer program. Further, the amount of collegiate program graduates continues to rise. The duplicated completion data indicate that, historically, the Illinois community college system increasingly has produced competent graduates prepared for further education or new or advancing careers.

The Illinois community college system prepares analyses on every aspect of its students' educational experience. In addition to enrollment and completion data, information is collected on student migration between community colleges and universities (shared data), follow-up of occupational program graduates, program review, minority studies, and transfer rate calculation. These studies, along with a comprehensive state strategic plan that encourages partnerships in education, government, and business, enable the Illinois community college system to carry out its mission to provide high-quality, accessible, cost-effective educational opportunities for the individuals and communities it serves.
